# Let BUDGET take care of your asphalt maintenance needs...

## PROTECT YOUR ASPHALT...

The effects from the sun and water dry out the oils in the top layer of asphalt. You will notice the effects from these factors when you start to see the asphalt turning from black to grey. Ideally, it is wise to seal coat before these effects occur. The sooner you seal coat your asphalt, quite simply, the sooner you will begin to protect your asphalt from the harmful effects of the sun and water.

**PREMIUM LATEX BASED COAL TAR SEALER BEING APPLIED IN PELHAM MANOR, NY**

We use a premium 100% COAL TAR based sealer. This is the "missing link" ingredient that makes the asphalt sealer DURABLE and RESISTANT to fuel and oil. We also add a LATEX BASED fortifier to increase the life and durability of our sealer.

## PREP AND APPLICATION...

We thoroughly clean and prep asphalt area. We trim any overgrowth/vegetation, power broom dirt and blow debris off driveway.

We fill cracks over 1/4" and apply a thick, smooth & uniform coat of sealer.

### HAND APPLICATION

**NO MESS ON CONCRETE!**

**Seal Coating and Crack Sealing** your asphalt will protect water from deteriorating the base and aggregate. Not only will it extend the life of your asphalt, it will also give your property an image "facelift".

## ASPHALT PAVING...

Installation of a new driveway might be your choice if your asphalt has deteriorated completely or if you want to redesign it!

- Paving**
- Expansions**
- Excavating**
- Grading**
- Patching**

Improper drainage or damaged areas of your asphalt need to be repaired. We can re-pave these areas for you.

# Service Beyond the Surface...
